

Year 3 Annual Report
Massachusetts Small MS4 General Permit
Reporting Period: July 1, 2020-June 30, 2021

Please DO NOT attach any documents to this form. Instead, attach all requested documents to an email when submitting the form

Unless otherwise noted, all fields are required to be filled out. If a field is left blank, it will be assumed the requirement or task has not been completed. Please ONLY report on activities between July 1, 2020 and June 30, 2021 unless otherwise requested.

Part I: Contact Information

Name of Municipality or Organization:

EPA NPDES Permit Number:

Primary MS4 Program Manager Contact Information

Name: Title:

Street Address Line 1:

Street Address Line 2:

City: State: Zip Code:

Email: Phone Number:

Stormwater Management Program (SWMP) Information

SWMP Location (web address):

Date SWMP was Last Updated:

If the SWMP is not available on the web please provide the physical address:

Part II: Self-Assessment

First, in the box below, select the impairment(s) and/or TMDL(s) that are applicable to your MS4. Make sure you are referring to the most recent EPA approved Section 303(d) Impaired Waters List which can be found here: <https://www.epa.gov/tmdl/region-1-impaired-waters-and-303d-lists-state>

Impairment(s)

Bacteria/Pathogens Chloride Nitrogen Phosphorus
 Solids/ Oil/ Grease (Hydrocarbons)/ Metals

TMDL(s)

In State:

Assabet River Phosphorus Bacteria and Pathogen Cape Cod Nitrogen
 Charles River Watershed Phosphorus Lake and Pond Phosphorus

Out of State:

Bacteria/Pathogens Metals Nitrogen Phosphorus

Clear Impairments and TMDLs

Next, check off all requirements below that have been completed. **By checking each box you are certifying that you have completed that permit requirement fully.** If you have not completed a requirement leave the box unchecked. Additional information will be requested in later sections.

Year 3 Requirements

- Inspected and screened all outfalls/interconnections (excluding Problem and Excluded outfalls)
- Updated outfall/interconnection priority ranking based on the information collected during the dry weather inspections as necessary
- Post-construction bylaw, ordinance, or other regulatory mechanism was updated and adopted consistent with permit requirements

Optional: If you would like to describe progress made on any incomplete requirements listed above, provide any additional information, and/or if any of the above year 3 requirements could not be completed due to the impacts of COVID-19, please identify the requirement that could not be completed, any actions taken to attempt to complete the requirement, and reason the requirement could not be completed below:

A total of 106 outfalls were screened and documented by the Buzzards Bay National Estuaries Program and Buzzards Bay Stormwater Collaborative. The screening focused on high priority locations. The discharge notes have been added to the Town's Stormwater webpage.

Annual Requirements

- Provided an opportunity for public participation in review and implementation of SWMP and complied with State Public Notice requirements
- Kept records relating to the permit available for 5 years and made available to the public
- The SSO inventory has been updated, including the status of mitigation and corrective measures implemented
 - This is not applicable because we do not have sanitary sewer
 - This is not applicable because we did not find any new SSOs

- The updated SSO inventory is attached to the email submission
- The updated SSO inventory can be found at the following website:

<https://www.marionma.gov/public-works-department/pages/stormwater-management-information-town-and-public-npdes-ms4-permit>

- Properly stored and disposed of catch basin cleanings and street sweepings so they did not discharge to receiving waters
- Provided training to employees involved in IDDE program within the reporting period
- All curbed roadways were swept at least once within the reporting period
- Updated system map due in year 2 as necessary
- Enclosed all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Updated inventory of all permittee owned facilities as necessary
- O&M programs for all permittee owned facilities have been completed and updated as necessary
- Implemented all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Inspected all permittee owned treatment structures (excluding catch basins)

Optional: If you would like to describe progress made on any incomplete requirements listed above, provide any additional information, and/or if any of the above annual requirements could not be completed due to the impacts of COVID-19, please identify the requirement that could not be completed, any actions taken to attempt to complete the requirement, and reason the requirement could not be completed below:

A salt storage shed is planned for the future DPW highway maintenance facility. One of the Town's treatment basins was inspected and cleared of vegetation to improve access for maintenance and inspection.

Bacteria/ Pathogens (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Annual message was distributed encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Permittee or its agents disseminated educational material to dog owners at the time of issuance or renewal of dog license, or other appropriate time
- Provided information to owners of septic systems about proper maintenance in any catchment that discharges to a water body impaired for bacteria

** Public education messages can be combined with other public education requirements as applicable (see Appendix H and F for more information)*

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Nitrogen (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Distributed an annual message in the spring (April/May) that encourages the proper use and disposal of grass clippings and encourages the proper use of slow-release fertilizers
- Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter

** Public education messages can be combined with other public education requirements as applicable (see Appendix H and F for more information)*

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall)

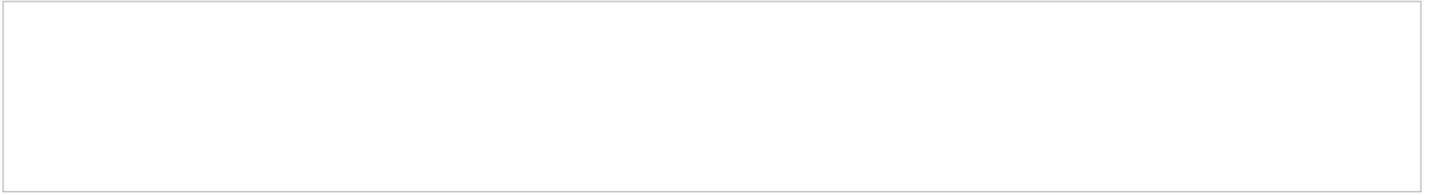

Potential structural BMPs

Any structural BMPs listed in Table 3 of Attachment 1 to Appendix H already existing or installed in the regulated area by the permittee or its agents was tracked and the nitrogen removal by the BMP was estimated consistent with Attachment 1 to Appendix H. The BMP type, total area treated by the BMP, the design storage volume of the BMP and the estimated nitrogen removed in mass per year by the BMP were documented.

- The BMP information is attached to the email submission
- The BMP information can be found at the following website:

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Optional: Use the box below to provide any additional information you would like to share as part of your self-assessment:

Part III: Receiving Waters/Impaired Waters/TMDL

Have you made any changes to your lists of receiving waters, outfalls, or impairments since the NOI was submitted?

- Yes
- No

If yes, describe below, including any relevant impairments or TMDLs:

Part IV: Minimum Control Measures

Please fill out all of the metrics below. If applicable, include in the description who completed the task if completed by a third party.

MCM1: Public Education

Number of educational messages completed **during this reporting period:**

Below, report on the educational messages completed **during this reporting period**. For the measurable goal(s) please describe the method/measures used to assess the overall effectiveness of the educational program.

BMP: Low Impact Development

Message Description and Distribution Method:

The pamphlet describes the different ways to reduce impervious surfaces and decentralize stormwater management systems to reduce potential stormwater impacts from property development. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience:

Responsible Department/Parties:

Measurable Goal(s):

The stormwater webpage tracks the number of visitors to the site.

Message Date(s):

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Stormwater Pollution Prevention for Small Construction Sites

Message Description and Distribution Method:

Lists ten steps for pollution prevention during construction of small developments. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience:

Responsible Department/Parties:

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Ongoing

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Dumpster Management

Message Description and Distribution Method:

Provides guidance on limiting leaks and spills from commercial dumpsters. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience: Industrial properties

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Ongoing

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Stormwater Pollution Prevention for Industrial Sites

Message Description and Distribution Method:

Provides guidance on preventing pollution from developed industrial sites. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience: Industrial property owners

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Ongoing

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Stormwater Prevention

Message Description and Distribution Method:

Provides basic information for homeowners to reduce the amount of potential pollution from runoff. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Ongoing

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Scoop the Poop: Why is it a problem?

Message Description and Distribution Method:

Informs pet owners of the hazards associated with leaving pet waste outside rather than bagging and disposing in a trash receptacle. The notice is given out to dog owners when they receive their annual license. It is also available to view and download on the stormwater webpage.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations, Town Clerk

Measurable Goal(s):

The number of licenses purchased each year as well as the number of visitors on the stormwater webpage.

Message Date(s): Email notification sent to residents annually (June/July) and ongoing on the webpage.

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Grass Clippings and Fertilizers

Message Description and Distribution Method:

Encourages homeowners to reduce fertilization and promotes the proper disposal of grass clippings. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Email notification sent to residents annually (April/May) and ongoing on the webpage.

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Managing Leaf Litter

Message Description and Distribution Method:

Encourages residents to rake and dispose of leaves to minimize the amount entering drainage systems. The document is available to view and download on the stormwater webpage.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Email notification sent to residents annually (Aug./Sept./Oct.) and ongoing on the webpage.

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: A Homeowners Guide to Septic Systems

Message Description and Distribution Method:

Educates homeowners on the importance of proper septic system maintenance. The document is available for viewing and downloading on the stormwater webpage.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations, Board of Health

Measurable Goal(s):

The number of homes and frequency of septic tank pumpout is tracked by the waste haulers and provided to the Board of Health.

Message Date(s): Ongoing on the webpage and as distributed with permits through the Board of Health

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: Stormwater Management for the Proactive Business Owner

Message Description and Distribution Method:

Lists basic maintenance tasks for business owners to properly dispose of potential pollutants.

Targeted Audience: Businesses, institutions and commercial facilities

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

The stormwater website tracks the number of visitors to the site.

Message Date(s): Ongoing on the stormwater webpage

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

Add an Educational Message

MCM2: Public Participation

Describe the opportunity provided for public involvement in the development of the Stormwater Management Program (SWMP) **during this reporting period:**

A stormwater webpage was set up as a link within the DPW site on the Town's webpage. Interested residents are encouraged to contact the DPW Engineer with any questions or comments.

Was this opportunity different than what was proposed in your NOI? Yes No

Describe any other public involvement or participation opportunities conducted **during this reporting period:**

The public is encouraged to report any problems with drainage or spills to the DPW and Board of Health. The DPW conducts a hazardous waste collection day each year.

MCM3: Illicit Discharge Detection and Elimination (IDDE)

Sanitary Sewer Overflows (SSOs)

Check off the box below if the statement is true.

This SSO section is NOT applicable because we DO NOT have sanitary sewer

*Below, report on the number of SSOs identified in the MS4 system and removed **during this reporting period.***

Number of SSOs identified:

Number of SSOs removed:

MS4 System Mapping

Optional: Provide additional status information regarding your map:

The mapping was updated by the Buzzards Bay National Estuaries Program during this reporting period.

Screening of Outfalls/Interconnections

If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring results should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses. Please also include the updated inventory and ranking of outfalls/interconnections based on monitoring results.

- No outfalls were inspected
- The outfall screening data is attached to the email submission
- The outfall screening data can be found at the following website:

<https://www.marionma.gov/public-works-department/pages/stormwater-management-information-town-and-public-npdes-ms4-permit>

*Below, report on the number of outfalls/interconnections screened **during this reporting period**.*

Number of outfalls screened:

*Below, report on the percent of outfalls/interconnections screened **to date**.*

Percent of outfalls screened:

Optional: Provide additional information regarding your outfall/interconnection screening:

The outfall screening targeted high priority discharges. Approximately 100% of those were screened.

Catchment Investigations

If conducted, please submit all data collected during this reporting period as part of the dry and wet weather investigations. Also include the presence or absence of System Vulnerability Factors for each catchment.

- No catchment investigations were conducted
- The catchment investigation data is attached to the email submission
- The catchment investigation data can be found at the following website:

<https://www.marionma.gov/public-works-department/pages/stormwater-management-information-town-and-public-npdes-ms4-permit>

*Below, report on the number of catchment investigations completed **during this reporting period**.*

Number of catchment investigations completed this reporting period:

*Below, report on the percent of catchments investigated **to date**.*

Percent of total catchments investigated:

Optional: Provide any additional information for clarity regarding the catchment investigations below:

All catchment investigations were performed by the Massachusetts Maritime Academy through the Buzzards Bay Stormwater Collaborative on behalf of the Town of Marion.

IDDE Progress

If illicit discharges were found, please submit a document describing work conducted over this reporting period, and cumulative to date, including location source; description of the discharge; method of discovery; date of discovery; and date of elimination, mitigation, or enforcement OR planned corrective measures and schedule of removal.

- No illicit discharges were found
- The illicit discharge removal report is attached to the email submission
- The illicit discharge removal report can be found at the following website:

*Below, report on the number of illicit discharges identified and removed, along with the volume of sewage removed **during this reporting period.***

Number of illicit discharges identified:

Number of illicit discharges removed:

Estimated volume of sewage removed: gallons/day

*Below, report on the total number of illicit discharges identified and removed to date. At a minimum, report on the number of illicit discharges identified and removed **since the effective date of the permit (July 1, 2018).***

Total number of illicit discharges identified:

Total number of illicit discharges removed:

Optional: Provide any additional information for clarity regarding illicit discharges identified, removed, or planned to be removed below:

Employee Training

Describe the frequency and type of employee training conducted **during this reporting period:**

DPW personnel were trained for IDDE by the Buzzards Bay National Estuary Program on April 15, 2021.

MCM4: Construction Site Stormwater Runoff Control

*Below, report on the construction site plan reviews, inspections, and enforcement actions completed **during this reporting period.***

Number of site plan reviews completed:

Number of inspections completed:

Number of enforcement actions taken:

Optional: Enter any additional information relevant to construction site plan reviews, inspections, and enforcement actions:

Large projects or development fall under Control Construction, which is the responsibility of the design engineer for respective projects. The design engineer provides the Town of Marion Building Department with affidavits confirming the project was constructed to the approved plans. No large development projects were submitted during the Year 3 time period.

MCM5: Post-Construction Stormwater Management in New Development and Redevelopment

As-built Drawings

Below, report on the number of as-built drawings received during this reporting period.

Number of as-built drawings received:

Optional: Enter any additional information relevant to the submission of as-built drawings:

Street Design and Parking Lots Report

Describe the status of the street design and parking lots assessment due in year 4 of the permit term, including any planned or completed changes to local regulations and guidelines:

This requirement was not initiated during the year 3 permit term.

Green Infrastructure Report

Describe the status of the green infrastructure report due in year 4 of the permit term, including the findings and progress towards making the practice allowable:

This requirement was not initiated during the year 3 permit term.

Retrofit Properties Inventory

Describe the status of the inventory, due in year 4 of the permit term, of permittee-owned properties that could be modified or retrofitted with BMPs to mitigate impervious areas and report on any properties that have been modified or retrofitted:

The Town has an updated list of permittee-owned properties. The list has not been evaluated during year 3 of the permit term with respect to opportunities to mitigate impervious areas or provide modifications for improved stormwater management.

MCM6: Good Housekeeping

Catch Basin Cleaning

Below, report on the number of catch basins inspected and cleaned, along with the total volume of material removed from the catch basins **during this reporting period**.

Number of catch basins inspected:

Number of catch basins cleaned:

Total volume or mass of material removed from all catch basins:

Below, report on the total number of catch basins in the MS4 system.

Total number of catch basins:

If applicable:

Report on the actions taken if a catch basin sump is more than 50% full during two consecutive routine inspections/cleaning events:

The area contributing runoff to the catch basin is inspected to determine the source of sediment and evaluate if stabilization of the road shoulder is required. The portion of the road or parking lot may also be flagged to require more frequent sweeping.

Street Sweeping

Report on street sweeping completed **during this reporting period** using one of the three metrics below.

Number of miles cleaned:

Volume of material removed: [Select Units]

Weight of material removed: [Select Units]

Stormwater Pollution Prevention Plan (SWPPP)

Below, report on the number of site inspections for facilities that require a SWPPP completed **during this reporting period**.

Number of site inspections completed:

Describe any corrective actions taken at a facility with a SWPPP:

N/A

Additional Information

Monitoring or Study Results

Results from any other stormwater or receiving water quality monitoring or studies conducted during the reporting period not otherwise mentioned above, where the data is being used to inform permit compliance or permit effectiveness must be attached.

- Not applicable
- The results from additional reports or studies are attached to the email submission
- The results from additional reports or studies can be found at the following website(s):

If such monitoring or studies were conducted on your behalf or if monitoring or studies conducted by other entities were reported to you, a brief description of the type of information gathered or received shall be described below:

Additional Information

Optional: Enter any additional information relevant to your stormwater management program implementation during the reporting period. Include any BMP modifications made by the MS4 if not already discussed above:

COVID-19 Impacts

Optional: If any of the above year 3 requirements could not be completed due to the impacts of COVID-19, please identify the requirement that could not be completed, any actions taken to attempt to complete the requirement, and reason the requirement could not be completed below:

Public outreach to obtain input on the SWMP was limited due to public meeting restrictions imposed due to COVID-19.

Activities Planned for Next Reporting Period

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 4 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree

- Develop a report assessing current street design and parking lot guidelines and other local requirements within the municipality that affect the creation of impervious cover
- Develop a report assessing existing local regulations to determine the feasibility of making green infrastructure practices allowable when appropriate site conditions exist
- Identify a minimum of 5 permittee-owned properties that could potentially be modified or retrofitted with BMPs to reduce impervious areas

Annual Requirements

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in connection with the dry weather screening and other relevant inspections conducted
- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program
- Conduct site inspection of construction sites as necessary
- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all curbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings and facilities, and vehicles and equipment; update if necessary
- Review O&M programs for all permittee owned facilities; update if necessary
- Implement all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implement program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Enclose all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Review as-built drawings for new and redevelopment to ensure compliance with post construction bylaws, regulations, or regulatory mechanism consistent with permit requirements
- Inspect all permittee owned treatment structures (excluding catch basins)

Provide any additional details on activities planned for permit year 4 below:

The town has been working on updates to the stormwater management regulations which is planned for submission for approval at the next annual town meeting in the Spring of 2022.

Part V: Certification of Small MS4 Annual Report 2021

40 CFR 144.32(d) Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name: Title:

Signature: Date:

[Signatory may be a duly authorized representative]

Attachment No. 1

Part II: Self-Assessment

Year 3 Requirements

Inspected and screened all outfalls/interconnections (excluding Problem and Excluded outfalls)

A total of 106 high priority outfalls were screened by the Massachusetts Maritime Academy for the Buzzards Bay Stormwater Collaborative and documented by the Buzzards Bay National Estuaries Program. The catchment investigation sheets are available on the Town's stormwater webpage. To date no illicit discharges have been discovered within the system.

Updated outfall/interconnection priority ranking based on the information collected during the dry weather inspections as necessary.

Suspicious flows were not discovered during dry weather inspections during this reporting period. Screening was focused on high priority outfalls.

Post-construction bylaw, ordinance, or other regulatory mechanism was updated and adopted consistent with permit requirements.

Stormwater Bylaws, including a requirement for submission of as-built drawings, have been drafted. The finalized Stormwater Bylaws will be submitted to the Select Board for review, adopted into the Town of Marion Bylaws, and included in SWMP. This will be completed in the Year 4 Reporting Period.

Annual Requirements

Provide an opportunity for public participation in review and implementation of SWMP and complied with State Public Notice requirements.

Opportunity for public review and comment of the SWMP was limited in Year 3 due to the COVID-19 pandemic. The stormwater webpage was significantly updated in Year 3 for viewing and downloading of documents by interested community members. Questions and comments may be submitted to the DPW Engineer by email listed on the page.

Kept records relating to the permit available for 5 years and make available to the public

Pertinent documents are posted to the stormwater website, and all records are kept at the WPCF Office, located at 50 Benson Brook Road, Marion, MA.

The SSO inventory has been updated, including the status of mitigation and corrective measures implemented.

One new SSO was reported during the Year 3 Reporting Period. The notification form is available on the stormwater webpage.

Properly stored and disposed of catch basin cleanings and street sweepings so they did not discharge to receiving waters.

Catch basin cleanings and street sweepings are stored at the DPW yard. There are no receiving waters within the vicinity of the DPW yard.

Provided training to employees involved in IDDE program within the reporting period.

The Town is within the jurisdiction of the Buzzards Bay Stormwater Collaborative, and utilizes their resources to meet the Towns monitoring and IDDE requirements. Assistance is also provided by the Buzzards Bay National Estuaries Program. Training of DPW Highway Maintenance personnel was conducted on April 15, 2021 by staff from the BBNEP.

All curbed roadways were swept at least once within the reporting period.

The Town began to draft and implement a street sweeping program in 2019. The program will be refined to complete street sweeping a minimum of two times per year (spring and fall), and be continued in the Year 4 Reporting Period.

Updated system map due in year 3 as necessary.

The Collaborative updated the outfall and interconnection inventory, focusing on priority outfalls during the year 3 reporting period.

Enclosed all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt.

The salt storage pile at the current location of the DPW Highway Maintenance facility continues to be covered with tarps. The planned new facility at Benson Brook Road will include a salt storage building.

Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities.

An MSGP and NOI was filed for the DPW Highway Maintenance Facility in 2020, and new NOI submitted in May 2021. Operation and Maintenance procedures have been written and are on file at that the WPCF Office, located at 50 Benson Brook Road, Marion, MA. On May 26, 2021, the Town was informed by personnel at the Stormwater & Construction Permits Section, Water Division, of the EPA (Region 1), that since the WPCF has a design flow of 0.588 MGD, and no approve pretreatment, the WPCF is not subject to industrial stormwater permitting. Therefore, a new NOI was not required to be filed.

Updated inventory of all permittee owned facilities as necessary.

The document is currently up to date.

O&M programs for all permittee owned facilities have been completed and updated as necessary.

This task is progressing but not completed. Additional progress will be made in Year 4.

Implemented all maintenance procedures for permittee owned facilities in accordance with O&M programs.

This has been substantially completed for the Highway Maintenance Facility and town parks and recreation areas.

Implemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants.
This is an ongoing task which requires further progress during Year 4.

Inspected all permittee owned treatment structures (excluding catch basins).

The town has a small number of surface basins and treatment BMPs which will be completed in Year 4.

Bacteria / Pathogens

Annual Requirements

Public Education and Outreach

Annual message was distributed to encourage the proper management of pet waste, including noting any existing ordinances where appropriate

A pamphlet regarding proper management of pet waste was prepared and included reference to the Town of Marion Bylaw 109-6. The pamphlet was included in the annual census mailing distributed to all residents. The mailing was distributed in December 2019. The notice was distributed to residents via email in August 2021, and is posted on the stormwater webpage.

Permittee or its agents disseminated educational material to dog owners at the time of issuance or renewal of dog license, or other appropriate time

Similar to the above, a pamphlet regarding proper management of pet waste was prepared and included reference to the Town of Marion Bylaw 109-6. The pamphlet was included in the annual census mailing distributed to all residents. The mailing was distributed December 2019. The notice is given out to dog owners when they receive their annual license. In addition, the notice was distributed to residents via email in August 2021, and is posted on the stormwater webpage.

Provided information to owners of septic systems about proper maintenance in any catchment that discharges to a water body impaired for bacteria

This information was posted to the stormwater webpage during the Year 3 Reporting Period.

Nitrogen

Annual Requirements

Public Education and Outreach

Distributed an annual message in the spring (April/May) that encourages the proper use and disposal of grass clippings and encourages the proper use of slow-release fertilizers

This information was posted to the stormwater webpage during the Year 3 Reporting Period. Email notification will be distributed to residents annually (April/May) starting in the Year 4 Reporting Period.

Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate

Similar to the above, a pamphlet regarding proper management of pet waste was prepared and included reference to the Town of Marion Bylaw 109-6. The pamphlet was included in the annual census mailing distributed to all residents. The mailing was distributed in December 2019. The notice was distributed to residents via email in August 2021, and is posted on the stormwater webpage.

Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter

This information was posted to the stormwater webpage during the Year 3 Reporting Period. Email notification will be distributed to residents annually (August/September/October) starting in the Year 4 Reporting Period.

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall)

The Town began to draft and implement a street sweeping program in 2019. The program will be refined to complete street sweeping a minimum of two times per year (spring and fall), and be continued in the Year 4 Reporting Period.

Potential Structural BMPs

Any structural BMPs listed in Table 3 of Attachment 1 to Appendix H already existing or installed in the regulated area by the permittee or its agents was tracked and the nitrogen removal by the BMP was estimated consistent with Attachment 1 to Appendix H. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated nitrogen removed in mass per the BMP were documented.

There are multiple BMPs throughout the Town, but they were not tracked for nitrogen removal consistent with Attachment 1 to Appendix H of the MS4 General Permit. The Town will utilize the services of the Collaborative or other consultant to quantify BMP nitrogen removal tracking in the Year 4 Reporting Period.

Attachment No. 2

Part III: Receiving Water/Impaired Waters/TMDL

Have you made any changes to your lists of receiving waters, outfalls, or impairments since the NOI was submitted?

In the Year 3 Reporting Period, the total number of Town-owned outfalls/interconnections screened by the Buzzards Bay Stormwater Collaborative was 106. No changes to the list of receiving waters or impairments have been made in the Year 3 Reporting Period.

Attachment No. 3

Part IV: Minimum Control Measures

MCM1: Public Education

Ten educational messages were completed during this reporting period. They are referenced in the Year 3 Annual Report and are available for viewing and downloading on the stormwater webpage.

MCM2: Public Participation

Opportunity for public review and comment of the SWMP was limited in Year 3 due to the COVID-19 pandemic. A stormwater webpage is available for viewing and downloading the informational pamphlets. Residents are encouraged to contact the DPW Engineer with any questions or comments.

MCM3: Illicit Discharge Detection and Elimination (IDDE)

Sanitary Sewer Overflows (SSOs)

One new SSO was reported during the Year 3 Reporting Period. The notification form has been posted on the webpage.

MS4 System Mapping

In Year 3 the Buzzards Bay National Estuaries Program updated the system mapping to include open channels. All the outfalls are shown and prioritized for screening.

Screening of Outfalls / Interconnections

The Town contracted with the Buzzards Bay Stormwater Collaborative and the Massachusetts Maritime Academy (MMA) to complete screening of the outfalls and interconnections. Screening of 106 outfalls and interconnections began in July 2020 and was completed during the Year 3 Reporting Period.

Catchment Investigations

The Town contracted with the Buzzards Bay Stormwater Collaborative and the MMA to complete screening of the outfalls and interconnections. Catchment investigations began in July 2020. As of June 2021, 106 outfalls were screened and recorded. Catchment investigations will continue during the Year 4 Reporting Period.

IDDE Progress

The Town contracted with the MMA to complete investigation of illicit discharges through screening of outfalls and interconnections and catchment investigations. The Collaborative in conjunction with the MMA and the Buzzards Bay National Estuary Program began IDDE investigation in the Town on August 2020, utilizing the Collaborative's Illicit Discharge Investigation Trailer. IDDE investigation will continue during the Year 3 Reporting Period. No results to report to date.

Employee Training

The Town of Marion is within the jurisdiction of the Buzzards Bay Stormwater Collaborative, and utilizes their resources to meet the Town's monitoring of IDDE requirements. The Collaborative prepared a series of IDDE training videos in June 2020. Town employees also received training specifically for IDDE by the Buzzards Bay National Estuaries Program on April 15, 2021, at the DPW Highway Maintenance Facility.

MCM4: Construction Site Stormwater Runoff Control

One construction site plan review, zero inspections, and zero enforcement actions occurred in the Year 3 Reporting Period.

MCM5: Post-Construction Stormwater Management in New Development and Redevelopment

Stormwater Bylaws, including a requirement for submission of as-built drawings, have been drafted. The finalized Stormwater Bylaws will be submitted to the Select Board for review, adopted in the Town of Marion Bylaws, and included in the SWMP. This will be completed in the Year 4 Reporting Period.

Work associated with Street Design and Parking Lots Report, Green Infrastructure Report, Retrofit Properties Inventory, due in Year 4 of the permit term, has not been started.

MCM6: Good Housekeeping

Catch Basin Cleaning

It should be noted that the catch basin equipment required repair during the Year 3 Reporting Period, and additional DPW personnel were trained on the equipment during the Year 3 Reporting Period.

Street Sweeping

Reported in the Year 3 Annual Report.

O&M Procedures and Inventory of Permittee-Owned Properties

All permittee-owned properties have been inventoried and included in the SWMP as of March 2020. O&M Procedures for vehicles and equipment were included in the Operations and Maintenance Program – Standard Operating Procedures, prepared by CDM Smith, in the Year 2 Reporting Period. O&M Procedures for parks and open spaces and buildings and facilities has been completed in the Year 3 Reporting Period.

Stormwater Pollution Prevention Plan (SWPPP)

Written MSGP SWPPPs for the DPW Maintenance Garage and WPCF were completed by GAF Engineering, Inc., in the Year 2 Reporting Period. Inspections are performed at these facilities on a weekly basis. The DPW Highway Maintenance Facility is planned for replacement subject to authorization of funding.
